Member Audit Bureau
of Circulations

Sir Ronald Edwards, chairman of Beecham Group Ltd, had some important news for shareholders last week (see page 128)

Dr T. D. Whittet was recently guest of the Chester Company of Mercers, Ironmongers, Grocers and Apothecaries at their annual dinner and also took part in the Chester Guilds church parade and service. He is pictured here presenting an ash tray with the London Apothecaries Arms to Mr J. J. Evans, an alderman of the Company

Code of practice for toiletries is ratified

A "code of good practice" has been ratified by the Councils of the Toilet Preparations Federation and the Society of Cosmetic Chemists of Great Britain, and is commended to all members as a voluntary standard.

The code is designed to give manufacturers a "set of working objectives which can be used to improve the manufacturing environment." It deals broadly with standards, personnel, premises and facilities, equipment and procedures.

The Federation and the Society are also to issue advisory "papers" on hygiene, safety in use and quality standards to be adopted where no statutory regulations apply.

What, no thermometer?

The National Pharmaceutical Union's "Holiday needs" check list received a mild ribbing in the BBC 2 Money Programme on July 23.

A reporter was sent out to purchase one each of all 62 items mentioned. The result—more than £30 was spent. Next, the largest available suitcase was bought. No use. The purchases could not be packed.

The only thing that seemed to be missing from the check

Contractors ask more for dispensing

A further claim for increased remuneration for chemist contractors has been lodged with the Department of Health by the Central NHS Committee. The claim — which follows a demand in May for a notional salary of £3,117 — seeks a profit margin of 14d per prescription and a re-allocation of costs between professional fees and on-cost.

The profit margin of 14d per prescription compares with the 5d per prescription negotiated for the three years 1967-69 as part of a "package" deal offered by the Ministry.

The text of the claim, sent by hand to the Ministry on Tuesday this week, is as follows:

- (a) That the managerial and staff salaries shown by the 1969 inquiry together with the notional salary costs of the working proprietor (see (d) below) and the appropriate proportion of the profit margin should be allocated to the professional fees;
- (b) That the overhead costs that will be shown by the inquiry, together with the appropriate proportion of the profit margin, should be allocated to on-cost;
- (c) That the profit margin to be allocated to (a) and (b) should be 14d per prescription;
- (d) That the notional salary for the working proprietor as applicable from January 1, 1970, and to be used at (a) above, should be £3,117 as claimed in our letter of May 14, 1970;
- (e) That the managerial and staff costs established in the inquiry should be used as a basis with the agreed indices for keeping the professional

fees remuneration under review;

(f) That the overhead costs established in the inquiry should be used as a basis with the agreed indices for keeping on-cost under review.

On the above basis, and subject to any amendments necessary to reflect the figures finally established by the inquiry, the Committee claims:

- (i) That with effect from January 1, 1970 payment should be based on a scale of professional fees to be calculated to yield the 1970 average of 3s 5d per prescription and an on-cost of 11½ per cent based on an average net ingredient cost of 10s per prescription, the scale and the on-cost figure to be adjusted according to the agreed index figures, when they become available, with retrospective effect to January 1, 1970;
- (ii) That a retrospective payment of 11½d per prescription should be made to each contractor in respect of each prescription dispensed in the first three-quarters of 1970. This figure represents the difference between the amount due and the amount paid for the period, adjusted to eliminate the overpayment brought forward at January 1, 1970.

Patent protection for pack

A pack of Ovanon which includes a card showing the correct sequence in which to take them has "inventive merit," two High Court judges decided last week.

Mr Justice Graham and Mr Justice Whitford, sitting as a Patent Appeal Tribunal, held that the manufacturers, Ovanon Laboratories Ltd, Morden, Surrey, were entitled to patent protection, and allowed the company's appeal against the Patent Office's ruling that the card was not a new method.

Mr Justice Graham said it was claimed that the dosage scheme was fully reliable. "If that turns out to be so, it will no doubt be recognised as a

valuable new weapon in the armoury of our female population," commented the judge.

Nobody else had suggested such a card with contraceptive pills. It gave a user the protection she wanted provided she followed the method outlined on the card.

The Tribunal, however, found that a twin-bottle pack of chemicals which, when mixed, provided a substance for use in hairdressing, was not of sufficient inventive merit to go forward to seek patent protection.

Mr Justice Graham said that the claim of L'Oreal, Paris, was so wide that it covered the purchase of two separate bottles of known substances which were placed in the same bag. There was nothing new in the chemical nor in the product which resulted when the bottles were mixed immediately before the substance was applied to the hair. The chemicals were known and were useful in other fields and neither the resulting substance nor the pack added anything to human knowledge which would be sufficient for grant of a patent.

The appeal of L'Oreal, from the decision of the Patent Office, was dismissed.

PT-exempt medicines listed

A further list of "essential" drugs and medicines has been temporarily exempted from purchase tax by the issue of Purchase Tax (No 3) Direction 1970. The effect of the Direction, which became operative on July 24, is to make the following additions to the entries contained in the Schedule of the Purchase Tax (No 1) Order, 1970 (see *C&D Year Book*, p 247)—the equivalent proprietary, where known, is given in square brackets.

Added to Head II of the Schedule are:

Amantadine [Symmetrel];
Betahistine dihydrochloride [Serc];
Chlorhexadol [Medodorm];
Fenticlor mixed with triamcinolone acetate;
Ketamine hydrochloride;
Disodium *p*-[di-(carboxymethyl-mercapto)arseno] benzamide prepared for veterinary use;

To Head III there is added 1,3-Di (*p*-chlorobenzylidene-amino guanidine hydrochloride. The Treasury will in due course be asked to make an order which will give permanent statutory effect to this direction.

Swiss graduates in chemistry from Berne University saw the production of synthetic emetine during a recent visit to Burroughs Wellcome at Dartford, Kent. Mr John Milligan (right) is seen here explaining the process to members of the visiting party

Kodak disown free film operations

The spread of "free-film" colour processing services which use the Kodak house colours in their literature, supply Kodak film and use Kodak material, has forced the company to deny that it operates such schemes itself.

In a statement issued this week, Kodak Ltd says that Kodacolor film in particular is being offered in this way. The public are offered a replacement or "free" film in return for an order for the processing of exposed film.

"We are finding that the public is frequently under the mistaken impression that these processing offers emanate from Kodak Ltd. We wish to stress that this is *not* the case and that Kodak does *not* operate schemes of this kind.

Accordingly, any members of the public who for any reason might wish to enter into correspondence about a particular offer should contact the appropriate processing service at the address shown on the mailing envelope and not write to Kodak Ltd."

Comment p 135.

Council to meet Bucks critics

The Buckinghamshire Pharmaceutical Committee is taking up an invitation of the Pharmaceutical Society's Council to meet during August to discuss health centre development in its area.

The meeting follows the committee's criticism of the Council's lack of leadership (see C&D July 4, p 25).

Standardised disinfectant terminology

The British Disinfectant Manufacturers' Association have issued a set of agreed definitions for use in describing the industry's products.

The Association are expecting their 43 members, representing a large proportion of the industry, to bring labels and literature into line with the definitions, and that the situation in the UK will be completely unified within the next two to three years.

The definitions are in three groups. Group I comprises three absolute terms, sterilisation, sterilant (or steriliser) and sporicide, which embrace all terms in Groups II and III.

Group II, classified definitive terms, with restricted meaning, includes bacteriostasis (but bacteristat) for the theoretical concept of a state in which bacteria are neither growing nor dying. Terms ending in "icide" and prefixed by the name of the organism acted upon, also fall into this class.

Group III deals with a number of terms in common use and includes:

Germicide—a chemical agent capable of killing the "germs"

usually associated with disease:

Disinfection—the destruction of micro-organisms but not usually bacterial spores; not necessarily killing all micro-organisms but reducing them to a level not normally harmful to health. The term is applicable in a commercial context solely to the treatment of inanimate objects and materials:

Antisepsis—the destruction of micro-organisms, but not bacterial spores, on living tissues . . . reducing them to a level not normally harmful to health . . . It implies, therefore, lethal activity, but it is sometimes . . . used in the static sense . . .

Sanitiser—a *disinfectant* with the connotation also of cleansing, used mainly in the food and catering industries.

The definitions are included in a Directory of Members' Products available from the BDMA, 93 Albert Embankment, London, SE 1.

Plans for 1971 aerosol congress

The eighth International Aerosol Congress will be held at the International Congress Centre RAI, Amsterdam, from October 12-14, 1971.

Marketing aerosols will be the main congress theme, and will be introduced by means of case histories. In addition, technical developments will be discussed and the future possibilities of the aerosol market.

The organisers are the Netherlands Aerosol Association. The congress secretariat is at 12 Europaplein, POB 7205, Amsterdam, tel. (020) 42 25 95.

Toothpaste claims 'invalid'

Eight widely-sold toothpastes have been judged ineffective for preventing tooth decay, by the United States National Academy of Sciences-National Research Council. As a result, the Food and Drug Administration intends to withdraw approval of the new drug applications for the products which lack proof of their claims.

Only one dentifrice, Crest, was found effective; another, NDK dentifrice, was found possibly effective. New Colgate Dental Cream-Gardol plus MFP, was not reviewed because it came on the market after 1963, but has also been found to be effective on the basis of data submitted.

Judged ineffective were Brisk, Colgate chlorophyll with Gardol, Colgate Dental Cream with Gardol, Antizyme, Kolyon fluoride, Super Amm-I-Dent and Amm-I-Dent toothpaste and powder.

FDA say the eight dentifrices lack proof for such claims as "stays active against tooth decay all day," "helps harden and strengthen the structure of tooth enamel on contact and to help prevent decay," and "destroys bad breath originating in the mouth."

No ruling on cosmetic colours

The Home Secretary was asked in the Commons last week if he would seek powers to ensure that colours used in cosmetics conformed to a permitted list which had been approved by his technical advisers.

Mr R. Sharples, Minister of State, replied: "I have no evidence that a general control of this kind is necessary. The trade associations concerned will shortly be publishing a code of practice giving guidance on the safety of ingredients used in cosmetics and I have no doubt that manufacturers generally will comply with it."

Mrs Joyce Butler asked when the report of the committee investigating the possible health hazards of using enzyme washing powders was expected to be received.

Mr Sharples: "The first inquiries are inconclusive and a wider investigation is to be made during the next six months."

Seven Seas

IMPORTANT CHANGE IN DISTRIBUTION ARRANGEMENTS.

As from 1st August 1970, your usual N.A.P.D. member wholesaler will be able to supply all your Seven Seas products.

The Seven Seas product range remains unaltered. Only the distribution arrangements have been changed.

- Seven Seas Cod Liver Oil 6 oz. and 16 oz.
- Seven Seas Cod Liver Oil Capsules 25's, 50's, 100's, 500's
- Seven Seas Mixable Mint Flavour Cod Liver Oil 6 oz.
- Seven Seas Orange Syrup 150 ml.
- Seven Seas 'Start right' Special Cod Liver Oil for babies (orange flavoured) 1 oz.
- Seven Seas 'Formula 70' Multivitamin/Multimineral Capsules 30's

Each product size is available in convenient, easy-to-handle, shrink-wrapped quantities.

Ask your wholesaler for details or contact
British Cod Liver Oils (Hull & Grimsby) Ltd., Marfleet,
Hull HU9 5NJ, Yorkshire, tel: 0482 75234 telex: 52535

REMEMBER

From 1st August 1970 order Seven Seas only from your wholesaler.

NEWS IN BRIEF

□ The Institute of Packaging has produced an illustrated folder on "Careers in Packaging." It is being distributed by The Central Youth Employment Executive to school careers advisers and youth employment officers.

□ Playing over his home course, Duddingston, Edinburgh, in the monthly medal, Mr M. Meehan MPS holed his tee shot at the 14th hole, distance 153 yards. Mr Meehan is the assistant secretary of the Edinburgh Chemists' Golf Club.

□ "Agro-chemicals—a manual for pharmacists," a 62p booklet produced by the Pharmaceutical Society of Ireland tabulates crops, pests and weeds with suggested treatments, rate and method of application and other data. Chemicals and proprietary products are cross referenced and chapters on safety and on control of rats are included. Free to members, 7s. to others.

□ "Supplement to Business Efficiency—an ABC of advisory services" published by the National Economic Development Office, 21 Millbank, London SW 1, updates the original 247 entries listed in the original publication. "Business Efficiency" and its supplement, describes in detail the advisory services provided by government, professional institutes, trade unions, research centres, universities and colleges. The "Supplement to Business Efficiency" is free from NEDO.

□ Pharmacies throughout France were closed on Wednesday of this week in protest at the Government's decision to make pharmacists pay 5 per cent (instead of the previous 2½ per cent) of their income from national health prescriptions to the national security office (last week, page 99). The pharmaceutical service given to the public was restricted to Sunday hours at selected pharmacies and dealt with only urgent prescriptions.

SPORT

Manchester Pharmaceutical Golfing Society. Winners of the invitation match played at Hopwood Golf Club, Manchester, on July 8 were: Dr White-wright and Dr I. Nagle; 2, Dr J. Doohan and Mr Moody. The winner of Phillipson Trophy, played for at Pleasington Golf Club, on July 15, was Dr J. Glass. Second was Mr J. Cropper.

Edinburgh Chemists' Golf Club. An all-day outing was held over Kilspindie Golf Course on July 6. Results: Morning round Crooke's Trophy, J. White (23) 63, July Trophy, J. Ferguson (8) 70. Best scratch score J. Ferguson, 78. Section one, T. R. Johnson (9) 72. Section two, J. H. Scott (19) 67. Afternoon round (Stableford): Section one, T. R. Johnson, 35 points. Section two, J. H. Scott, 35 points; J. Linton, 35 points.

Irish Chemists' Golfing Society. An enjoyable day's outing was had by the Society at the Castle on July 23 when Kodak Ltd provided the prizes which were later presented by Irish manager, Ted Cowmeadow, at the traditional end of day get-together in the clubhouse. Results: Class A, A. Walsh (11) 40; D. Tracey (12) 38; D. Mulvey (6) 35. Class B, A. C. Hennessy (14) 38; T. Mullen (15) 37; C. O. Greene (16) 34. Next outing is at the Royal Dublin course on August 6.

The Xrayser column

The outs and the ins

It would seem, from the report of the proceedings in Parliament in connection with the Misuse of Drugs Bill, that there are few differences between the "ins" and the "outs" in the matter of the need for control and the means of enforcing it. The social consciences on both sides of the House on that particular question display remarkable unanimity.

I noted with interest that the Home Secretary (Mr Reginald Maudling) informed Members that he had had a letter from the president of the General Medical Council offering further talks on the control of over-prescribing and that Mr Maudling said that there had been wide interest in the possibility that the GMC might take responsibility in the matter. He added that he would be happy to talk with the GMC and other professional bodies involved. Pharmacy, I imagine, would come into the category of one of the other professions to which he referred, and the Council of the Pharmaceutical Society should indicate its readiness, as it has done in the past, to co-operate in every way possible. I note that Mr Eric Ogden paved the way during the debate by conveying the support of the pharmaceutical profession for the Bill.

While the problem of over-prescribing must remain primarily a medical one — indeed, the prior responsibility is in the hands of the individual general practitioner — there may be ways in which pharmacy can assist. I am not sure that Dr Tom Stuttaford (member for Norwich South) is correct in stating that the hazard of the over-prescribing doctor could be easily solved if it were illegal to charge for prescriptions for particular drugs, though he did not particularise the drugs he had in mind, or at least the reports I have seen did not go into detail.

If he was referring to an unscrupulous minority, it would be extremely difficult to prove that any money had changed hands. He went on to refer to over-prescribing of barbiturates, saying that it occurred constantly, and he accused doctors of giving 100 sleeping capsules so that the patient would not come back for a month.

Large quantities

We have all met, and are constantly dispensing, prescriptions for 100 such capsules, and that is by no means the maximum quantity prescribed. I have handled even twice that number, and the solution to the problem is not easily found. What for example, would be the effect on prescribing habits if, as has been mooted, there should be a consultation fee payable to the doctor by the patient?

Would some prescribe even larger quantities, out of consideration for the pocket of the patient? Or would some, out of consideration for their own, prescribe fewer, so that they would have a vested interest in the frequency with which they saw their patients? That is only one aspect, but the fact remains that Mr William Deedes (Ashford) stated that a breakdown of the fifteen million prescriptions for barbiturates annually indicated that there was an average of 80 tablets per prescription, and that seems a figure which goes beyond the limits of ordinary needs, if not of safety. The fact that the GMC is aware of its responsibility is important, for the source of the problem is to be found within its own family.

Use a sledgehammer

In reply to a question in the House of Commons, Mr Gordon Campbell (Secretary of State for Scotland) said that the cost of checking entitlement to exemption from prescription charges was about £15,000, and that charges recovered from those claiming incorrectly amounted to £341. But whether, as the elder Weller said in another connection, it was worth while going through so much to learn (or earn) so little is a matter of taste.

COMPANY NEWS

Developments at Beechams

Two new products are being developed by Beecham Group Ltd, chairman Sir Ronald Edwards told shareholders last week.

The first is for the treatment of Parkinson's disease and should, he said, compare well with any of the established therapies. If marketed it would be the company's "curtain raiser" for their work outside the antibiotic field.

Within the antibiotic field another "powerful compound has been developed from the penicillin nucleus which is even more effective than many of the existing narrow spectrum products."

Expansion of pharmaceutical production facilities in Belgium and the US are costing about £10m, he said. The Belgian works should come into operation in the autumn and gradually take over the supplies for the Common Market area. Extension to the US plant has just been completed at a cost of £2½m and the new factory planned for Scotland should be operating by 1972. The first stage of the latter project will cost £9m.

Cheerful note from Rimmel

Rimmel Ltd showed an "impressive advance" in the year ended March 31 and their profits are expected to continue on a rising scale, according to Sir Max Rayne, chairman, Carlton Industries Ltd, which company holds 71.43 per cent of Rimmel, Rimmel International and Jane Seymour, in his annual statement.

Cosmetics and toiletries contributed £503,000, before tax, to the group profit (against £407,000 in 1969). Pharmaceuticals, soaps and other products provided £819,000 (£842,000).

Sir Max reports that consolidated trading profit of Carlton Industries rose to £1.68 m (previous year: £1.22 m) and profit after tax, £926,000 (£613,000). Sales increased to £14.58 m (from £8.27 m).

The Sanitas group of companies were part of Carlton Industries but were acquired by LRC International Ltd on April 1. The Sanitas profits, therefore, feature in the above figures.

Burrough's profit dip

Although the turnover of James Burrough Ltd rose by £1.16m to £8,841,375, pre-tax profits for the year to February 28, dipped to £1,295,562 (from £1,436,799). The net figure was £706,562 (against £775,993). The dividend total is held at 28 per cent.

LRC hold dividend

With a final dividend of 22½ per cent LRC International Ltd have maintained a total of 37½ per cent for the year ended March 31.

Group profit, before tax, improved to £3,010,000 against a forecast of not less than £3m and with £2,904,000 for the previous year. Net profit is £1.68m (£1.66m) before tax of £886,000 (£887,000).

In brief

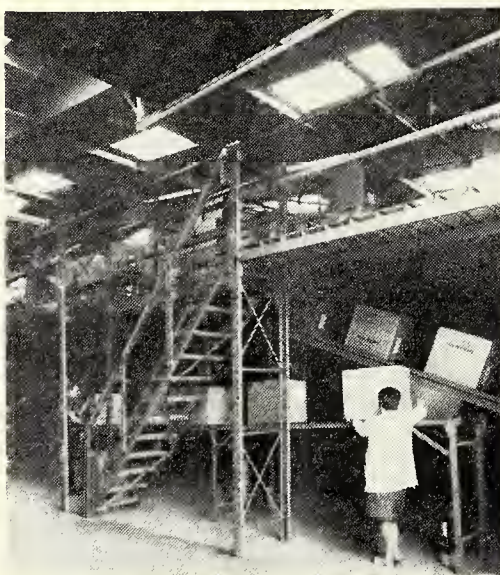

Bellair Cosmetics Ltd state that agreement has been reached in principle for the acquisition by them of the whole of the share capital of Saga of Bond Street Ltd, licensees of Faberge Inc in the UK.

Schering AG: group sales in 1969 advanced to DM 914.9m (from DM 736.2m in 1968). Net profit after tax and depreciation etc was DM 41.1m (DM 40.8m). Dividend is unchanged at 20 per cent.

Steetley-Berk offers: The recommended offers by Steetley Co Ltd for the capital of Berk Ltd other than shares already owned (July 4, p 11) have been declared unconditional.

Appointments

Cuxson, Gerrard & Co Ltd: The following changes of the board are announced: Mr Douglas J. Green becomes joint managing director with responsibility for production, general administration and finance; Mr P. H. Barlow and Mr H. Hobbs become directors on August 1; and Mr A. D. Gerrard, in his eighty-third year, retires from the board and active participation in the management on September 30 to become the company's first president.

Smith and Nephew Ltd have established a new distribution depot at Cumbernauld, near Glasgow, to serve their customers over the whole of Scotland. It is equipped with a raised storage area built by Dexion Ltd. The raised area shown here is built on a structure of Dexion Speedlock heavy duty construction system, and is served by Dexion Auto Flow level and incline conveyors

W. Aston & Co Ltd, Worthing: Mr. H. P. Slack and Mr. S. C. C. Tapp have been appointed joint managing directors, with Mr E. J. W. Cuer remaining as chairman of the board.

Dr H. Egan has been appointed Government Chemist with effect from October 2. He will succeed Dr D. T. Lewis who is retiring from the public service.

Chesebrough-Pond's Ltd have appointed Mr J. B. Chilton their director of manufacturing and Mr J. Ball, sales development manager.

PEOPLE

Dr William Pollack, MSc, PhD, vice-president and director of research, diagnostics, Ortho Research Foundation, New Jersey, has been on holiday in England. Last week in London he forecast that among the next advances in medicine would be the development of physiological monitoring to build up a "profile" of the individual, from the foetal stage onwards, and opening up exciting prospects for controlling the diseases that become predictable.

Dr Pollack said that Ortho have a number of diagnostic aids under development that may play a role in this area. First to succumb were likely to be coagulopathies and environmentally- and genetically-controlled aberrations, including some mental illnesses.

Deaths

Ross: On July 21, Mr Mitchell Cumming Ross, BSc, FPS, 38 Rubislaw Den South, Aberdeen.

Mr Ross graduated BSc at Aberdeen University and qualified as a PhC in 1926. He succeeded to the family business of Wm. Paterson & Son, wholesale chemists, Aberdeen, at a comparatively early age on the death of his father, and successfully managed the business until it was acquired by T. H. Smith Ltd, Edinburgh. After it was merged in the Vestric group, he continued as branch manager until his retirement just over two years ago. One of Mr Ross' daughters, Mrs Sally Leiper, is also a pharmacist.

Mr. T. S. Davidson writes: Mitchell Ross was held in high esteem in pharmacy circles in the North-east of Scotland. The personal interest he took in his firm's customers, made the name of "Patersons" synonymous with friendly relations and good service. He was always willing to give the benefit of his wide experience to anyone in need of it.

A spokesman for **Vestric Ltd** said: Many pharmacists in NE Scotland will remember the help given them by Mitchell Ross and he has always been known for his willingness to give help and advice to all who called at his office. He was widely known for his collection of pharmaceutical mortars he brought together from all parts of the world. This collection is to remain with the company and will serve as a reminder of the many years he gave to the company.

NEW PRODUCTS AND PACKS

Cosmetics and toiletries

Maybelline new eye shadow range

Trio is a new range of Maybelline eye shadows packed in three-pot palettes and each containing one frosted highlighter.

The range includes four colour sets, and the colours include: 1. Misty blue, Twilight grey and Frosted white highlighter. 2. Pony brown, Gentle green and Frosted white highlighter. 3. French navy, Turquoise and Frosted white highlighter and 4. Lime green, Moss olive and Frosted Daffodil highlighter.

The main feature of the Trio range is the addition in each palette of a four sided sponge-topped applicator. (Plough (UK) Ltd, Victoria House, Southampton Row, London, WC1. Distributors Richards and Appleby, Derby Street, Ormskirk, Lanes.)

Fob-watch bottle

This month Roger & Gallet are adding to their long-established Extra Vieille eau de Cologne range a neat fob-watch shaped bottle of Extra Vieille, (7s). A dispenser unit has been designed holding 24 units in a red, white and gold colour theme. (Roger & Gallet Ltd, Hambleton House, 17b Curzon Street, London, W1Y 7FE.)

Salon spray through retail

Steiner Products are now marketing the hairspray which is in general use in Steiner salons. Under the name Professional hair spray (14s 6d), the product is said to be suitable for 99 per cent of all types of hair.

It comes in a single size of can — 377g. (Steiner Products Ltd, Ashburton House, Ashburton Grove, London N 7.)

Frosted Cake Eyeliners

The new Frosted Cake eyeliners (7s 10d) are Max Factor's latest creation designed to achieve a "softer look" in eye make-up. The names of the Frosted Cake eyeliners are descriptive: Frosted charcoal, a silvery grey-black; Frosted brown, a soft shimmery brown; Frosted soft green, a fern green; Frosted soft blue, a delicately frosted navy and Frosted Burgundy, a deep plum. The eyeliners are presented

in blue containers with transparent lid. (Max Factor Ltd, 16 Old Bond Street, London W1X 4BP.)

Trial size after shave

A trial size Aqua Manda after shave (5s) is being offered by Goya. The new bottle contains 28 cc and has the distinctive plastic cap used for the series. (Goya, 161 New Bond Street, London W1.)

Baby care

Nursery sundries

A new range of nursery sundries has been brought out by S. Maw Son & Sons Ltd. It comprises: a five-piece feeding set in white or lemon (8s), fluted brush and comb set in white or lemon (6s 6d), hand decorated brush and comb set (10s 6d), anti-splash potty, white or lemon (9s) 8in potty, white or lemon (6s 6d), three piece feeding set (7s), keep warm plate (12s 3d), child's training seat (12s 6d), feeding beaker (3s 6d), food and bath thermometer (12s 8d), pram nets (6s) Terry bibs (2s), Terry feeders (5s 10d), baby sponge (1s 4d), Neat 'n Tidy baby bag (21s), baby bath mat (9s 6d), plastic bib (1s 6d) and plastic overall feeder (2s 6d). (Maw's Pharmacy Supplies Ltd, Aldersgate House, New Barnet, Herts.)

Baby nurser

The Playtex baby nurser is a bottle feeder with a collapsible inner liner that contains the food. The soft liner collapses as the milk is withdrawn, avoiding vacuum formation and air blocks. The liner is pre-sterilised and disposable.

The Playtex baby nurser (49s 11d) comprises a natural action teat, bottle holder and 65 pre-sterilised disposable inner liners. Distribution is through wholesalers in the Midlands, Anglia, London, Southern, Harlech and Westward television regions. The nurser is also being currently sold in the Lancashire, Yorkshire television areas. It is expected to be available in the North of England and Scotland "around February 1971" and in Ulster and Eire by early May 1971. (Playtex Ltd, Port Glasgow, Renfrewshire.)

PRESCRIPTION SPECIALITIES

SERENID FORTE capsules

Manufacturer John Wyeth & Brother Ltd, Huntercombe Lane South, Taplow, Maidenhead, Berks

Description Green and red capsules each containing 30 mg of oxazepam

Side effects Transient mild drowsiness in the first few days of therapy, but this usually disappears on continued treatment

Pack Bottle of 100 (38s trade)

Supply restrictions PI, S4B

Issued August 1970

TRADE NEWS

Measles vaccine again offered to pharmacists

Glaxo Laboratories Ltd announce that Mevilin-L freeze-dried measles vaccine is again being made generally available to retail pharmacists and dispensing doctors.

For the past year, Mevilin-L has been the only measles vaccine available in the UK but all supplies have been distributed by the Department of Health and Social Security.

Mevilin-L is recommended for administration ideally at 12 months of age or as soon thereafter as possible. There is no upper age limit for vaccination.

Mevilin-L is available in single-dose vials (16s) with 0.5-ml ampoule Water for Injection BP. (Glaxo Laboratories Ltd, Greenford, Middlesex.)

Safety container goes into Eire

Palm 'n Turn safety containers for tablets and capsules are now being distributed to pharmacists in Ireland by May Roberts (Ireland) Ltd. They are already available in Britain through some wholesalers, 12 agents, or the manufacturers, Anodex Ltd, Rusham Works, Rusham Road, Egham, Surrey.

The Palm 'n Turn container which is designed to help reduce accidental poisoning in children—the closure has to be depressed and twisted simultaneously to open—was featured in the *C&D* March 15, 1969, p 231.

New address

Estée Lauder Cosmetics Ltd, has moved to 71 Grosvenor Street, London, W1X 0BH (Tel: 01-493 9271).

Contract packaging

The Athol Chemical (UK) Ltd, Thetford, Norfolk, is a recently-formed company whose products range from detergents, cleaners and air fresheners to such devices as the Trigger Gun—a manually-operated spray head that "atomises a variety of liquids".

The company has also arranged licences in respect of a refillable aerosol pack that is operated by a spring and compressed air. The directors are E. W. Mendelsohn and J. Douma who aim to achieve a high degree of flexibility on their packing and production lines so that they can economically undertake long and short production runs to meet clients' demands for continuous or experimental marketing.

New formulation of Anturan

The Pharmaceuticals Division of Geigy (UK) Ltd, Macclesfield, Cheshire, has now introduced Anturan as small, yellow film-

Maws have launched a new merchandising unit, the "Maws baby bar," to display the complete family of Maws' nursery products, including the new range of baby care essentials (see p.129). The bar, a free-standing unit occupying only 3.7 sq ft of floor space, is the latest development in Maws' new streamlined marketing strategy. (Maws Pharmacy Supplies Ltd, Aldersgate House, New Barnet, Herts.)

coated tablets to replace the white scored compressed tablets. While differing in colour and size from the earlier tablet, each contains 100mg sulphapyrazone.

The new tablets are now being phased in as stocks of the white scored tablets are exhausted. During the change-over period each pack of 100 film-coated tablets contains two adhesive labels which explain the change and can be attached to the dispensed container.

Maws and Seven Seas

Maws Pharmacy Supplies Ltd and British Cod Liver Oils (Hull and Grimsby) Ltd have jointly decided that Maws will not be handling the distribution of Seven Seas as from July 31, British Cod Liver Oils are now distributing Seven Seas through chemist's wholesale outlets. Both companies announce that the earlier arrangements were terminated with goodwill on both sides.

PROMOTIONS

"Win a cruise" competitions

A special promotional pack for the Steiner Professional hair spray "win a cruise" competitions is being sent to all retailers who place an initial order of 1 dozen or more. The pack contains 72 entry forms, a header card, a poster and five window pennants, plus full details of the competitions.

First prize in each contest is a luxury cruise for two aboard RMS Andes. There is a consumer competition and the retailer who sells the product to the winner of this qualifies for the top prize. There is also a window display competition for stockists. (Steiner Products Ltd, Ashburton House, Ashburton Grove, London N7.)

Consumer offers

□ Beecham Toiletry Division, Great West Road, Brentford, Middlesex. Two "daisy tokens" from packs of Silvikrin shampoo bottles entitle shopper to 2s 6d voucher redeemable against new Silvikrin hair spray.

□ Jackel & Co Ltd, Kitty Brewster Estate, Blyth, Northumberland. Banded double pack of Proteinail "two for the price of one."

□ NPU Marketing Ltd, 321 Chase Road, London N14. NPUM nail polish remover, price reduction of 6d to 2s 6d—margin unchanged. Offer presented on bottle label.

□ Elida, Hesketh House, Portman Square, London W1A 1DY. Harmony hair colours, 2s voucher redeemable against Sunsilk hair spray.

Old Spice

1970 Holiday

Inventiveness, flair and initiative shone out of your Old Spice window displays in this year's competition. The standard of interest was higher than ever and I should like to thank everyone who took part; especially, if I may, those usually un-praised sales assistants who worked so hard.

Sorry that everybody could not win!

Congratulations to the prize winners and our thanks to you all.

Managing Director

1st Prize Southern: H. W. Clifton & Sons

The panel of judges met at 100 Brompton Road, London S.W.3 on Wednesday 15th July, 1970. Five factors were taken into account during the judging and points were then added together to give the final result.

The five sections were:-

1. Display of the poster provided by Shulton.
2. Presentation and style of the window display.
3. Detail and originality of the window.
4. How the Old Spice products were displayed.
5. Selling effectiveness of the window.

The promotion certainly produced a lot of excitement from Old Spice stockists all over the country. The standard of window dressing was as good if not better than last year and it was very encouraging to find such ingenuity and creativity amongst the high number of entrants.

1st Prizes

17 days holiday in India with first-class travel by Air-India

Northern Area

Anthony Davison, MPS,

COMMENT COMMENT COMMENT COMMENT COMMENT

Dangerous mirage

Anybody who has had pushed through his letterbox one of the envelopes advertising a "free film offer" could be forgiven for thinking that Kodak Ltd were behind the scheme. Not only is "Kodacolor" the most prominent name on many of these envelopes, but the Kodak house colours are used either for the background or the legend. Wording such as "Kodak-trained operatives," "printed on Kodak paper" and "Kodak-inspired quality control," adds to the illusion.

It is not surprising, therefore, that Kodak should find themselves the subject of attack by retail dealers and the recipients of correspondence on the schemes from the public. The statement they have issued this week denying that they are associated in any way with the schemes (p 125) can thus be seen as aiming to maintain the company's good name with the trade and to set the record straight with the public.

The principle of the free film offer is that the customer uses an envelope provided by the processor to send off his first film — all makes of negative colour film and sometimes black and white are invited, including the Nu-film being tested by NPU Marketing. Payment has to accompany the order, and when the prints are returned, a free film of the size submitted (usually Kodacolor) is included, plus credit vouchers for unprintable exposures. This is economically possible through bulk purchase of the films and saving the dealer's margin by going direct.

For the customer, the schemes represent a discount of about 30 per cent if all the negatives are printable — more if there are any "failures." But that is not all, if the promotional "blurb" is to be believed. At least one processor puts out leaflets which hit at chemists in a big way. "Think how this cuts out any haphazard middlemen," they say, "after all, there are many thousands more letter boxes than there are chemists. And letter boxes stay open all the time."

Faults in dealer participation

The proliferation of such schemes may well make the chemist in an area flooded with door-to-door envelopes clutch at the straw offered by the free-film-through-dealer services which are also springing up.

But beware. As already explained, the "free" film is financed by cutting out dealer profit in the direct schemes. If the dealer stays in the chain, the profit *must* come from increased business.

The Wholesale Photo Finishers' Association (now the Association of Photographic Laboratories) recently put out some figures to show just how much increased business is required merely to stand still, profitwise. For example, the WPFA calculates that when the average number of printable negatives — nine on a C X 126-12 film — is valued under this type of scheme, the required increase in business to break even is 188 per cent. This takes into account the fact that the dealer would normally make a profit on the sale of the film as well as on the D&P service he provides.

Such increases may indeed be attainable with a limited franchise approach by the processing house — at the expense of the dealer down the road, of course. The

Detail from one of the "free film" envelopes

schemes may thus seem attractive if the alternative is to lose business. But what happens if "free" films follow in the footsteps of trading stamps? It should be remembered by the retailer that such gimmicks are difficult to give up once everyone is promoting them, and at that stage no-one makes extra profit but the scheme's proprietor.

The amount of promotional literature currently being distributed by the free-film houses may however, be misleading in terms of their danger to the retailer. Kodak have estimated that in 1969 about 6 per cent of the colour negative market was held by such schemes. This year the proportion is expected to rise, perhaps to about 10 per cent. However, the total market should go up by some 15 per cent so that the chemist and the traditional photofinishers should still find their turnover increasing—in spite of free films.

If United States experience is anything to go by, the free film offers will take an increasing share of the market — but it will level off because the public is suspicious of this type of trading where film processing is concerned. Kodak research recently showed that only 5 per cent of people are interested in cut price processing, and many people feel "safer" if their film is committed to a dealer rather than to the post. This week's news from the Post Office concerning proposed increases in post charges and postal order poundage may, perhaps, also work as a deterrent to processing-by-post.

Paradoxically, it is the margin the dealer receives on processing that has allowed "free" films into the market. Admittedly, the dealer has to cover such overheads as unclaimed work, but if there were a lower margin there would be no room to take out of it the cost of a new film — even at bulk purchase rates. Such a move would not be in anyone's interest at present as service would suffer, but it is a trump card available to the photofinisher-dealer partnership if the threat becomes too great. As we have indicated, price-cutting is "out" with customers.

How then to answer the challenge now? Obviously by providing that quality of personal over-the-counter service the photographer is looking for, stressing the quality of processing offered and perhaps quietly pointing out the savings on postage etc. Above all, give the customer the confidence that he or she can safely "leave it all to the chemist."

LETTERS

NI policy is no policy

I feel that the so-called statement of policy on health centres issued recently by the Council of the Pharmaceutical Society of Northern Ireland (*C&D* July 18 p 84) should not be allowed to pass without comment. This is not a statement of policy. It is, at best, an admission that the Council of the Society has no policy on the matter and, at worst, a subtle way of saying that the Council has no intention of interfering with the piece-meal destruction of pharmacy which is taking place before our eyes and in which certain members of the Council appear to be the willing collaborators.

The "statement" says, "In areas where health centres are proposed, — (chemists) should be allowed to decide the course of action that their best interests dictate." This to me is the antithesis of a policy. What is needed is an overall policy which will apply to all health centres, where ever they may be proposed.

We need leadership from the Council, not this spineless attitude of letting small groups of chemists, isolated from the profession as a whole, decide what best suits their interests. This is simply playing into the hands of those who seem determined to destroy pharmacy as we know it, without consulting either the profession or the people who will have to use health centre dispensaries, and replacing the present system with something very much inferior which is neither needed nor wanted.

The Board's intention

The Northern Ireland General Health Services Board, implementing Government policy, is bent on organising the pharmaceutical service through health centres, regardless of who gets hurt in the process.

The decision either to go into, or stay out of a health centre is not a decision that affects only those concerned with a particular centre. It is a decision that will have repercussions throughout pharmacy, and this being so, is much too important a matter to be left to the sectional interests of any small group of chemists. These decisions should be subject to a policy decision, made by the profession as a whole through their elected representatives. These representatives would have a lot more information at their disposal than a small local group of chemists and they would be much less vulnerable to pressure than a small group, presented with a mass of very dubious facts and figures by a high powered team of officials of the Board. Divide

and conquer seems to be the policy of the Board and unfortunately it is succeeding all too well.

We have three bodies representing pharmacy in Northern Ireland, the Ulster Chemists' Association, the Local Pharmaceutical Committee and the Council of the Society. Already two of these bodies are on record as being of the opinion that health centre pharmacy is fraught with dangers for chemists, the third is all in favour of "going into health centres."

There is no need to say which body is the "odd man out." The Council of the Society, of course! If the Council of the Society is right in its opinion that the future of pharmacy lies in health centre pharmacies, how did the other two bodies go so far astray? Or have Council members some special divine revelation which is denied to the lesser mortals on the other committees, and which insures them against making mistakes and therefore entitles them to ignore the opinions of their professional colleagues? It would appear that the members of Council have become so mesmerised by a few "pie in the sky" visionaries in the Council that they have lost touch both with reality and the wishes of their fellow chemists.

They say a country gets the kind of government that it deserves. This also applies to professions. I think the moral should be clear to "the rank and file" in our profession. There are such things as elections, even in pharmacy.

James A. Boyle,
Armagh

It sticks!

The Leeds local conference committee has been accused. The crime — the production of a non-stick car window sticker. We plead not guilty. The new wonder adhesive on the front of the stickers is merely "invisible." Just moisten it and place the sticker where you will.

Proud car-sticker owners are assured of a "Yorkshire" welcome when we greet them in September. For those who feel left out there is still time. Apply now for your conference tickets (and your car-sticker!) to Mr T. W. Fisher, MPS, 11 Woodthorpe Park Drive, Sandal, Wakefield, Yorkshire.

Join the "in" crowd, at the Leeds conference — September 13-18 — there is need for no one to be stickerless.

John I. Mitchell,
Publicity officer, Leeds committee

Kodak prices

Once again Kodak Ltd have acted with gross discourtesy to the thousands of pharmacies who must contribute the bulk of their business.

The first indication I received that Kodak's prices were to be increased was from an article in our local evening paper, printed in the same town as Kodak's headquarters, Hemel Hempstead. On telephoning them in order to secure an order at the old prices, I was informed that no more orders were being accepted at that time due to the "very low stock position." I telephoned again last week (when the

new prices were operative) and, surprise surprise, the stock position was now back to normal, as if by magic, and orders were then being accepted once more.

This is an example for the Government to study of how the public interest is not being served by the tactics which can be adopted by a near monopoly.

It goes without saying that to date (July 27) Kodak have not had the courtesy of sending notification of these new prices to either of my two shops.

J. V. Tapster,
Watford

An initial problem

This company has had serious misgivings regarding the broader prescription use of the "nomen proprium" designation being used in the diminutive "NP." Several of our ethical pharmaceuticals have been placed in a very difficult position, as over the years these products have been recognisable by the ethical name followed by NP as suffix. We are endeavouring to correct this by prefixing our product names by ANP, but we find this is not easy to re-establish in the ethical field.

T. M. Heath,
Sales director,
Northern Pharmaceuticals Ltd

Is NPUM with us?

The Editor of the NPU super glossy *Nutimes* asks "Are you with us?" — "us" presumably being NPU Marketing Ltd. At the risk of saying that everyone else is out of step, I think that we, the NPU members, their customers and ultimately their employers, should ask are they, NPUM, with us?

The "Marketing force that really works for Pharmacy" estimated the demand for the Hanx/Turtle wax offer so well that hardly any members in the South-west could get any, and many members who ordered other paper products at the same time, before the price increase, find that now they have filled their shelves and stock rooms, there is a new promotional pack and that that has been out for three weeks before anyone is told about it.

When the marketing was done by the cream of the NPU executive — amateurs all, but amateurs who knew how a pharmacy worked — we pulled with them, probably for the wrong business reasons, perhaps just because they were amateurs. But these so-called professionals, who keep telling us how clever they've been, who by trading on old loyalties demand our support but don't earn it, need to be told that they are a marketing force that draws a salary from pharmacy and the sooner they start working for pharmacy the better for all of us.

Really, of course, we're all with NPUM, but if they really worked for pharmacy they wouldn't leave us with a stupid little "stop press" about sore throats "story next *Nutimes*" (which could be four to six weeks). They'd put a Roneo'd sheet in with the glossy so that we know what to say to the pastille salesman who calls before the next edition.

A. O. Bond,
Glastonbury, Somerset

Free film menace

The practice of "giving away" Kodacolor film free seems to be growing. Some of these philanthropists are photolinishers and the latest of these appears to me to be particularly objectionable, since he is offering an exclusive "agency" to anyone who will co-operate.

The lure is only one agency "in each area," but it does not say how big each area is. The agent is offered both increased profits and free Kodacolor films for the customer.

Now, since giving away free film will cut out about half each dealer's profit, it follows that the only way he can increase his profit is to take over the next dealer's D & P as well as his own, which looks very nice in one direction, but not in the other.

Since the scheme is said to be backed "by the resources of a large public group of companies," it also follows that any dealer who decides to be a "go-ahead, ambitious and enterprising character who wants to be one step ahead of the Joneses" is going to find himself working twice as hard as he did before to put money into the pockets of some nameless industrial tycoons and their shareholders, who haven't done photography a penny-worth of good.

There is only one company who can stop this type of trading from damaging their own interests and those of the dealers who helped them to build up photography to its present position, and that is Kodak. However, I am not at all

sure that putting up prices, as they did last week, is the best way of doing it.

If the future of photographic dealing is to include free films, perhaps we could hear from Kodak on this subject.

Arthur Bastow,
Modbury, Devon

[Kodak have this week issued a statement on free film offers (see p. 125) —Editor.]

Plea for legibility

As a representative I see many pharmacies. As a pharmacist of a pharmaceutical family I care for pharmacy.

I do not like what I see in many pharmacies — unreadable labels. A case can be made for doctors' bad handwriting but none for that written on labels to be read by laymen. No doubt there are excuses — I have been given them — but no good reasons.

Although we all like to see a well-written label, it is a typewriter which is the answer, both for legibility and for speed. The NPU machine costs a lot of money, but if more people could see it in use I am sure they would be as impressed as I.

There are a number of "ordinary" typewriters in use, many without the useful roller clip which the NPU can supply, but they are much inferior in speed and give less good results.

Can more be done to promote the use of this machine?

Do the schools use them in teaching dispensing?

H. J. Reynolds,
South Brent, Devon

Mr. Iain Macleod

The tragic death of Mr Iain Macleod was a shock to the nation and particularly to his former colleagues at the Ministry of Health.

He was one of the great Ministers I had the honour to serve. Well do I remember a few days after his taking office his invitation to meet him and talk at length on matters pharmaceutical. His keen intellect, his grasp of the National Health Service, his searching questions and above all, his warmth and friendliness created a lasting impression.

His immediate acceptance of an invitation to attend the closing session of the British Pharmaceutical Conference in London in 1953 was typical of his interest in pharmacy; I shall always treasure happy memories of our many meetings during his term of office.

Pharmacy mourns the passing of this great man and extends its sympathy to his wife and family.

Harold Davis,
Chief Pharmacist, Ministry of Health
1947-1967

QPL economy

PROFESSIONAL NEWS

Pharmaceutical Society
of Northern Ireland

'Up to profession to devise health centre scheme'

The Ministry of Health and Social Services has told the Council of the Pharmaceutical Society of Northern Ireland that it is up to the pharmaceutical profession to set out an acceptable scheme for limitation of contracts. It would be quite inappropriate for the Ministry to devise a scheme and seek to impose it on the profession.

At the meeting of the Council of the Society in Belfast on July 16, a letter from the Ministry was read stating that the Ministry appreciated the considerable effect the limitation of contracts would have on the practice of pharmacy. They were anxious to ensure that a comprehensive pharmaceutical service was available to the public and that pharmacists should be afforded the optimum conditions for the exercise of their profession.

However, the profession would have to set out an acceptable scheme. It was also essential that the whole profession should fully support any scheme submitted.

The letter asked for suggestions in connection with the work load for pharmacists and how, in practice, amalgamation of pharmacies could be encouraged in the event of a limitation of contracts being in force.

Mr J. Kerr said that at the joint meetings in December and January it was evident that all present were in favour of limitation and rationalisation. However, the matters should be included in the agenda for the annual meeting.

Mr H. W. Gamble suggested that immediate attention should be given to the work load — a matter very much in the minds of pharmacists contemplating the possibility of health centre pharmacies. It was agreed to hold a meeting of representatives of the pharmaceutical bodies and, later, a special meeting of the Council.

The secretary reported that no reply had yet been received from Mr J. Hume, MP to whom he had written about the drug problem in Londonderry (*C&D*, July 18, p 84). He had been informed that most of the drugs to which Mr Hume had referred in his speech at Stormont were Fourth Schedule poisons.

The president welcomed Mr Thomas A. Gray to his first Council meeting.

A letter from the editor of the *Retail Chemist* was read. It was agreed that no useful purpose would be served by publishing statements issued from time to time by the Council in other than the professional journals.

A bank overdraft at July 31, 1970, in the Society's account was estimated by the treasurer to be £1,700. He understood the decision had now been taken to reduce from 50 per cent the portion of the licence fees handed over to the Society by the Ministry of Home Affairs. This would mean a fall of about £700 in the Society's income next year.

The president drew attention to the fact

that the date for the September Council meeting coincided with the meeting of the British Pharmaceutical Conference in Leeds which he and the secretary hoped to attend. It was agreed to hold the meeting on September 10.

Arrangements are being made to hold the dinner and dance for the Benevolent Fund at Woodlands Hotel, Belfast, Lisburn on November 11.

Health centre pace quickens in NI

The changing pattern of medical practice towards health centres is shown in the annual report for 1969-70 of the Northern Ireland General Health Services Board.

The number of centres in operation has increased from two in 1966-67 to 18 in 1969-70. A further six centres are under construction, 34 are actively being planned and 19 more are under consideration. The Board hope that at least one centre incorporating a pharmacy will come into use during next year.

Whereas in 1966-67 there were six doctors catering for 11,000 patients operating from health centres there were, in 1969-70, 88 doctors catering for 162,000 patients. Northern Ireland has 747 general practitioner principals with 1,562,000 patients on their lists.

The report lists 17 centres where the provision of pharmacies is being considered. There is, it says, no doubt that modern therapy makes it very desirable that pharmacists should collaborate closely with family doctors and other professional colleagues, and health centres provide excellent conditions for such close association.

The Board recognises that the establishment of a health centre raises many problems for the pharmacists in its area and the staff have tried to pass on as much information as possible. However, until health centres incorporating pharmacies are working, it is not possible to answer all questions now being raised.

The pharmaceutical service accounted for the Board's largest expenditure increase in 1969-70. At £415,608 the increase was 12.8 per cent compared with an increase of 7.01 per cent on the service as a whole, to £14,537,385.

Costs rose steeply during the year and the average cost per form at £1 2s 4.7d was about 1s 9d higher than for the previous year.

The number of forms dispensed in-

creased by 0.49 per cent but was less by 3.04 per cent than the number for 1967-68.

Costs per form and per prescription normally up in July and August showed an exceptional rise of 1s 1d per form and 8d per prescription between June and July falling to the June figure in autumn. This is explained by the probable tendency of doctors to order larger quantities of drugs during the civil disturbances at the time.

The unnecessary work created for the pharmacist by the failure of patients entitled to exemption from prescription charges to complete the exemption certificate on the prescription form is noted by the Board. Percentage of prescriptions exempt from payment rose during the year to 55 per cent.

The total amount received by chemists during the year was £7,562,406 — an increase of 9.49 per cent. £88,009 of that sum related to an increase in the Special Advance. Over 72 per cent of the amount received represents the cost of ingredients and containers used in dispensing.

The number of pharmacists providing a service decreased by four during the year, to 597, and the number of pharmacies by seven, to 643. A pharmacy was opened in a village previously without one and another in Sector 1 of Craigavon new town.

(Annual report of the Northern Ireland General Health Services Board, HMSO Belfast 3s.)

NOTES ON NEW MEDICAMENTS

Mithramycin

Mithramycin is a yellow, water-soluble antibiotic obtained from cultures of *Streptomyces plicatus* and *S. argillaceus*. It has a complex eight-ring structure, with an anthracene-type nucleus, and although it has a certain degree of activity against Gram-positive organisms, it is chiefly of interest because of its unusual antineoplastic properties.

It is effective chiefly against embryonal tumours of the testes, and although the mechanism of action is not yet clearly understood, preliminary studies have shown that mithramycin forms a complex with DNA (deoxyribonucleic acid). Binding of the antibiotic occurs in the presence of magnesium and other divalent ions, and thus inhibits subsequent DNA-directed synthesis of RNA (ribonucleic acid). This inhibition may be the key to the antineoplastic action of the drug.

Mithramycin is intended for use only in patients with tumours of the testes resistant to or not suitable for other forms of treatment, as the drug may produce severe haemorrhagic reactions.

It is of interest to note that mithramycin is also of use in reducing the hypercalcaemia and hypercalciuria associated with bone lesions linked with other types of tumour. Restoration of a normal serum level of calcium may be achieved with doses lower than those required for the treatment of testicular tumours.

MARKET NEWS

Buyers shun the high prices

London, July 29: The unions representing the dockers, having decided to end the strike, have recommended that work should resume on Monday. Whether or not the dockers at individual ports agree to this remains to be seen. Meanwhile, when resumption is complete, it will take a long time for trade to get back to normal.

Up to date there has been no panic buying but there were the occasional spot quotations for some of the spices which were described as "ridiculously high." As might be expected in the present quiet period there were no transactions recorded at these "scarcity" levels.

Cascara and hyoscyamus (*niger*) were actually lower in price. Brazilian menthol was dearer while Chinese was nominal. Dearer also were witchhazel leaves, Saigon nux vomica and a number of aromatic seeds.

Pharmaceutical chemicals

Ammonium acetate: Kegs (50 kg) BPC 1949 7s 3d kg; solution (200 kg drums) strong, 2s 3½d kg.

INFORMATION FOR MANUFACTURERS

Printed ointment tubes

Adelphi Manufacturing Co Ltd, 20 Duncan Terrace, London, N1 can now offer printed collapsible tubes, for only a few shillings more per gross than the price for plain tubes. Printing eliminates the undesirable use of peeling transferable labels, as well as saving on "sticking time". Printed tubes can be supplied in both small and large quantities.

Distributors of Dutch sugars

A Revat & Co (Chemicals) Ltd, 87 Tooley Street, London SE1, have been appointed by J. T. Baker British distributors for their range of sugars made by J. T. Baker Chemicals NV of Deventer, Holland. Sixty different compounds are currently available, including *L*- and *D*-arabinose, *D*-mannose, *L*-rhamnose and *L*- and *D*-xylose. Also included are their substrates, carbolines, lichen acids, flavanoids, anthocyanins, catechins and glycosides.

Sampling of H&R fragrances

Haarmann & Reimer, Holzminden, Germany, have started a series of pamphlets containing heat-sealed samples of shave lotion, personal deodorants, creme de parfum and other products made with some of their fragrances.

The pamphlets are being posted to cosmetic manufacturers (Haarmann & Reimer Ltd, Kingsway House, Richmond, Surrey.)

Resin for hair sprays

With a new resin from National Adhesives & Resins Ltd, Braunston, Rugby, Warwickshire, the company say that hair spray and wave-set lotion manufacturers can now prepare formulations that offer "high humidity curl retention plus improved adhesion to hair with good gloss characteristics."

The new resin, National 28-2930, can be formulated to impart either a soft or a firm crisp feel to the hair.

Achromycin[®] price reduction

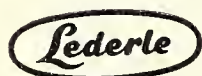

As from July 27th, 1970 the trade prices of Achromycin tablets (tetracycline hydrochloride) will be reduced as follows:

**250 mg tablets £1 3s. 0d. per 100
£11 1s. 8d. per 1,000**

These new prices are in accordance with the recently adjusted reimbursement price set by the Central NHS Contractors Committee.

The reduction reflects the determination of Lederle Laboratories to remain competitive in price while maintaining the highest possible standard of quality control and service to the pharmacist.

Achromycin is available through the entire pharmaceutical wholesale trade as well as direct from Lederle Laboratories.

OBESITY IS A KILLER DISEASE

Obesity can lead to high blood pressure, diabetes and heart disease. It may worsen many other conditions.

Customers who ask for slimming advice should be encouraged to consult their doctor. Diagnosis with Ponderax skinfold calipers is much more accurate than by weighing machine.

They also act as guide to the dosage of Ponderax required to produce an optimum effect, restore metabolic equilibrium, and reduce hunger. Ponderax (Fenfluramine) is a glycoliptic agent which produces substantial weight loss without the dangers of stimulation.

We shall be pleased to forward full information on request.
